DETAILED ACTION

The abstract of the disclosure is objected to because it is not in one paragraph form. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: The specification lacks headings.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Muise et al. 6,637,623.

Muise et al show a fluid dispenser comprising a reservoir 24, orifice 25, closure 26, outer wrapper 4 and reinforcing structure 22.

Allowable Subject Matter

Claims 2-16 and 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Garcia et al, Simkins and Otake are cited to show further

examples of a dispenser having and outer wrapper. Wakayama and Liebel are cited to show further examples of reinforcing structures.
